

# Pedestrian bridge Fallenbach

Projectno  
12010

Client  
Bartholet  
Maschinenbau AG

Planning  
July 2012

Production and delivery of the steel structure for a single span bridge. The workshop drawings for this project were also made by us.

The key dimensions of the bridge are:  
length 51 m, width 3,6 m, height 15m.

To make sure that all parts of the structure fit, the bridge has been pre-assembled at our production facility.

The surface treatment of the bridge consists of hot dip galvanization.

Amount of steel: 32 tons.

Realized by: Smulders Polska Sp. z o.o.
